

GREEN STREET Planting Designs

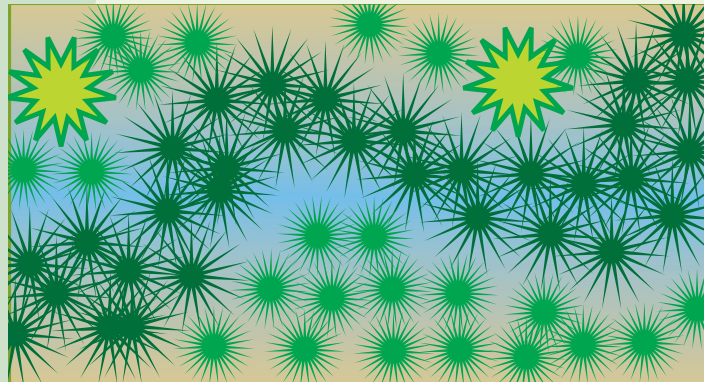

Sustainable stormwater management for clean rivers - green street facilities mimic nature by collecting stormwater runoff and letting it soak into the ground, as plants and soil filter pollutants.

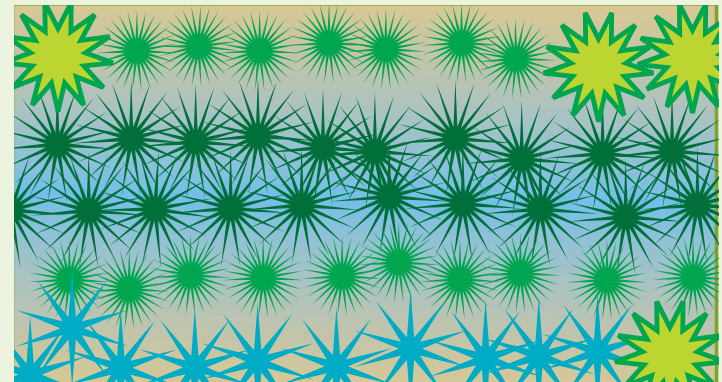

SINGLE SPECIES: This is a clean, simple design using one plant choice

RANDOM: This vibrant design works well with 3 or more plant choices

CURVILINEAR: This graceful design works best with 3 or more plant choices

TRADITIONAL: This structured design works best with 3 or more plant choices
