Bicultural Outreach

Across all of our programs, we are working to become more inclusive by strengthening partnerships with the BIPOC community.

Specifically, we are working to become **bicultural*** in Spanish. We provide Spanish **transcreation**** of all materials. We also have a native Spanish speaker at our events to guide participants through the event and answer questions and we hold volunteer events that are conducted entirely in Spanish.

*Combining cultural elements of both cultures
**Adapting a message from one language to another while maintaining its intent, tone, style, and context

REJUVENATING OUR NATURAL PLACES & URBAN SPACES

Who we are

Our mission is to empower community members to protect and restore southwest Washington's waterways and natural areas for the benefit of current and future generations.

Since 2008, we have been working with volunteers, cities, government agencies, community partners, and businesses across Clark County.

How we help

We focus on watershed health through creekside restoration projects, tree plantings, litter cleanups, and educational outreach. Most of our work is accomplished by volunteers. To learn more and volunteer at an upcoming event, visit www.thewatershedalliance.org/events.

RIPARIAN RESTORATION

By removing invasive species and planting native plants, we are improving habitat for local fish and wildlife.

LITTER CLEANUPS

By removing trash from beaches around Clark County, we prevent these materials and other pollutants from entering our waterways and hurting animal life.

Healthy Watersheds

We provide outreach and education around watershed health to community members across Clark County.

Our outreach efforts include a neighborhood micro-grant program, an environmental film series, and water quality-focused events and workshops.
