

WEST MULTNOMAH

Soil & Water Conservation District

We're here to help you help the land!

We help families and individuals improve environmental conditions on land around their apartments or houses, schools, businesses, and organizations.

Do you have environmental concerns?

We will get you answers.

If we can't help, we will connect you to people who can.

Participation is voluntary and we do not enforce any laws or regulations.

Get involved!

Contact us for more information.

Translation available on request.

Gardens and natural areas: Install a school or community garden. Tour a project in a natural area. Learn about the cultural significance of native plants. Replace invasive weeds with native plants.

Climate change action: Contact us about ways we can work together to keep our land and communities healthy.

Environmental education: We provide information about how to care for healthy native plants, soil, streams, and wildlife habitat. Interested in sharing what you know about how to make things grow? Come to Soil School. www.wmswcd.org/projects/soil-school/

Clean water action: Learn easy ways to manage rainwater on site through hands-on demonstrations. Join a Stormwater Stars project. www.stormwaterstars.org

We provide:

-  financial resources,
-  information,
-  and people to help plan and carry out a project.

We envision all people in our district are informed about and confidently engaged in the long-term caring for and giving back to the land. Everyone has the opportunity to connect or reconnect with the land, especially those who have been displaced from or deprived of land. People's engagement and connection to the land ensures clean water, clean air, healthy soil, and diverse habitats for thriving communities, fish, and wildlife.

Where we work:
We are a publicly-funded conservation organization. We work in Northwest, Southwest, and South Portland, a small section of Lake Oswego, and Sauvie Island. This includes downtown and areas around Forest Park, Tryon Creek State Natural Area, and the Oregon Zoo.
